PROFESSIONAL SUMMARY

Self-taught Full Stack Web Developer and entrepreneur with proven, real-world experience building, launching, and operating live web applications. Founder of PascalLinks (pascallinks.com) — a live digital services platform in Ghana offering data bundles, airtime, gift cards, social media boosting, and a marketplace, currently serving real users. Owner of two live production websites demonstrating full ownership of the entire software lifecycle: design, development, deployment, and operations.

Specialized in building scalable RESTful APIs with Node.js and Express.js, MongoDB database design with Mongoose, and connecting frontend interfaces to backend services using Vanilla JavaScript and the Fetch API. A fast, independent learner who builds real products that solve real problems. Currently deepening expertise in JWT authentication, React.js, and advanced cloud deployment. Actively seeking remote developer roles, internships, and freelance opportunities.

ENTREPRENEURSHIP & LIVE PRODUCTS

Founder & Full Stack Developer — PascalLinks

2024 –

Present

pascallinks.com | store.pascallinks.com — Live & Active in Ghana

- ▶ Founded and independently built PascalLinks, a live multi-service digital platform currently serving real users across Ghana.
- ▶ Designed the entire product from scratch — architecture, backend, frontend, UI, and deployment — with no team.
- ▶ Platform features four core service modules: Data Bundles, Gift Cards, SMM Boosting, and a Marketplace.
- ▶ Implemented real user authentication with account creation, sign-in, and session management.
- ▶ Integrated payment processing to handle real transactions for data, airtime, and gift card purchases.
- ▶ Deployed and manages two live domains: main platform (pascallinks.com) and dedicated store (store.pascallinks.com).
- ▶ Handles all aspects of the business: development, hosting, domain management, customer service, and product updates.
- ▶ Demonstrates rare ability to take a product from idea to live users — not just code, but a working business.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, RESTful API Design, CRUD Operations, Error Handling, Middleware, Route Architecture

Database & ORM: MongoDB, Mongoose ODM, Schema & Data Modeling, Validation, MongoDB Atlas Cloud, Indexing

Frontend Development: HTML5, CSS3, Vanilla JavaScript (ES6+), Fetch API, DOM Manipulation, Responsive Design, Flexbox, CSS Grid

API Testing: REST API, HTTP Methods (GET, POST, PUT, DELETE), Status Codes, JSON, Thunder Client, Postman

Deployment & Hosting: Live website deployment, Domain management, Subdomain configuration, DNS, Production environment management

Tools & Workflow: VS Code, Git, GitHub, Nodemon, dotenv, npm, CORS, Web Hosting

Currently Learning: JWT Authentication, Bcrypt, React.js, Railway / Render Deployment

DEVELOPMENT PROJECTS

Student Result Checker

2026

Full Stack App — Node.js | Express.js | MongoDB | HTML | CSS | JavaScript

- ▶ Built complete full stack app with automated grade calculation — score input automatically returns grade (A–F) and pass/fail status.
- ▶ Full CRUD REST API with try/catch error handling on every route and Mongoose schema validation.
- ▶ Frontend connected to backend in real time via Fetch API — data flows from form → Express → MongoDB → screen.
- ▶ Tested all endpoints with Thunder Client including edge cases and invalid data scenarios.

Product Management API

2026

E-commerce Backend + Frontend — Node.js | Express.js | MongoDB | HTML | CSS | JavaScript

- ▶ Full Product REST API with name, price, description, owner, image URL, and stock status fields.
- ▶ Connected HTML/CSS/JS frontend with live product listing, add form, edit price modal, and delete — all without page reload.
- ▶ Proper HTTP status codes (200, 201, 400, 404, 500) and JSON error responses on all routes.

Note Taking Application

2026

REST API + Frontend — Node.js | Express.js | MongoDB | HTML | CSS | JavaScript

- ▶ Notes API with title, content, category (Work/Personal/School/Others), importance flag, and timestamps.
- ▶ Frontend displays ★ star on important notes and groups by category for easy reading.
- ▶ Checkbox HTML input wired to JavaScript .checked property for live importance toggling.

Task Manager API

2025

Backend REST API — Node.js | Express.js | MongoDB | Mongoose

- ▶ REST API for task management with title, Boolean completion status, and automatic timestamps.
- ▶ Full CRUD operations built and tested — foundation project that established core API skills.

User Management System

2025

Backend REST API — Node.js | Express.js | MongoDB | Mongoose

- ▶ User registration and management API with name, email, password, phone, address, and role fields.
- ▶ Input validation and descriptive error messages across all routes.

EDUCATION

University of Business and Integration Development Studies

Present

Upper West Region, Ghana — Current Undergraduate Student

- ▶ Combining formal academic education with independent full stack development and entrepreneurship.
- ▶ Launched a live business and built multiple production projects alongside university studies.

Self-Directed Full Stack Web Development

2024 –

Present

Project-Based Learning — Documentation, Tutorials & Hands-On Building

- ▶ Mastered Node.js, Express.js, MongoDB, Mongoose, HTML, CSS, and JavaScript through building real projects.
- ▶ Went from zero coding knowledge to owning two live production websites and a real business.
- ▶ Independently debugged complex backend errors (CORS, routing, schema validation, async/await).
- ▶ Built 5+ full stack projects of increasing complexity — each one more advanced than the last.

ADDITIONAL INFORMATION

Contact: 📞 0595046967 | ✉️ cyrillantam@gmail.com

Availability: Immediately available — remote work, internships, freelance projects, and entry-level full-time roles.

Work Authorization: Based in Ghana — legally available to work remotely for international companies worldwide.

Key Strengths: Entrepreneurial mindset, fast learner, self-motivated, strong debugging skills, ships real products.

Languages: English (Professional), Local Ghanaian Languages (Native).

Interests: Web Development, Backend Architecture, E-commerce, SMM Technology, Civic Tech, Entrepreneurship.
